Previous Result

The Previous Result is listed for the most recent test performed by Labcorp in the past 5 years where there is sufficient patient demographic data to match the result to the patient. Results from certain tests are excluded from the Previous Result display.

† Fasting

Patient Results Summary

Cholesterol comes in different forms and has varying effects on your heart health. Some cholesterol is “good” and not known to cause disease, this is HDL. The rest of cholesterol causes disease by clogging your arteries, this is non-HDL. LDL cholesterol is the largest component of the non-HDL cholesterol. Lowering your levels of “bad” cholesterol will lower your risk for disease.

- **LDL cholesterol (LDL-C)** is the largest component of the non-HDL cholesterol (“bad” cholesterol).
- **non-HDL** is composed of many different types of cholesterol (not just LDL-C) and high levels cause disease.

The level to which your LDL must be lowered depends on the risk for developing heart disease or having a heart attack. The higher your risk for heart disease, the lower your LDL goal.

Contributing Risk Factors For Heart Disease	
☐ Heart and/or vascular disease	☐ Cigarette (tobacco) smoking
☐ High blood pressure	☐ Low HDL (men less than 40 mg/dL, women less than 50 mg/dL)
☐ Diabetes	☐ Family history of early onset heart disease
☐ Chronic kidney disease	☐ Man over 45 years or woman over 55 years
☐ Obesity	☐ Familial Hypercholesterolemia

Test / Your Results

LDL-C

117 mg/dL

non-HDL

147 mg/dL

Your Heart Disease Risk Category

Selected by your physician based upon your risk factors and clinical judgement.

☐ Low

☐ Intermediate

☐ High

▽ = Your Result: Left (Green) = Optimal, Center = Acceptable, Right (Red) = High Risk

Your Care Plan (as selected by your physician)	
☐ Eat less trans fats and saturated fats, red meat, and sugary foods/drinks	☐ Control any other medical conditions: such as diabetes, high blood pressure
☐ Eat more vegetables, fruits, whole grains, low-fat dairy products, poultry, fish, and nuts	☐ Visit your doctor as scheduled and obtain all follow-up tests/treatments recommended
☐ Exercise	☐ Take all of your medications your doctor(s) have prescribed
☐ Lose weight	☐

Disclaimer: You should discuss this information with your physician. Labcorp does not have a doctor-patient relationship with you, nor does it have access to a complete medical history or physical examination conducted by a physician that would be necessary for a complete diagnosis and comprehensive treatment plan. Neither you nor your physician should rely solely on this guidance. Bolded result descriptions in “Comments” consider either the reference range or target range for the test result. Reference range refers to the Labcorp reference interval. Target range refers to the guideline-suggested goal.
